

Elektronika MK-66 / MK-66A: Keypad Legend

Key legend is printed on each key. Second function (above the key) is used by pressing **F** first; **CF** cancels.

Original legends

As printed on the calculator

English equivalents

Common Western calculator notation

ВП – enter exponent · ЗП – store to memory · ИП – recall memory · СП – clear memory · П – memory
· X↔П – exchange display & memory · Г – degrees · P – radians · tg – tangent · lg – log₁₀

Inverse (arc) followed by sin/cos/tan gives arcsin/arccos/arctan. X↔Y swaps display and constant register. The MK-66A calculates trig functions in degrees only.
